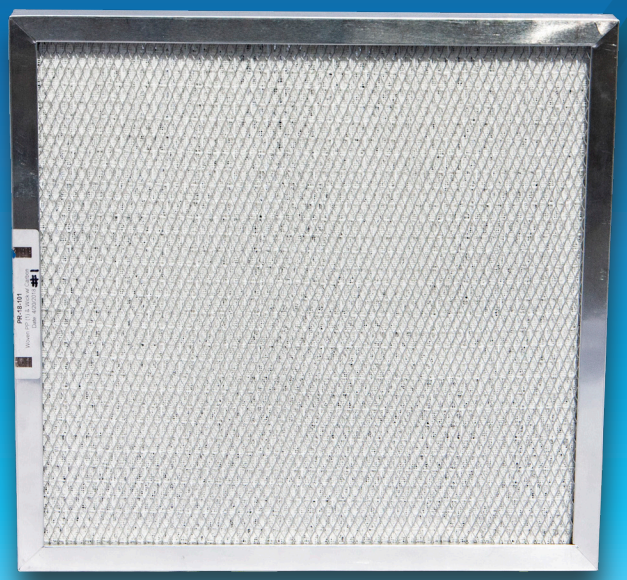
DRIEAZ

KEEP EACH FILTER WRAPPED UNTIL READY FOR USE

4-PRO™

DEHUMIDIFIER FILTER

Designed ***specifically*** for professional use in restoration, remediation and construction environments



ONE FILTER Protects in FOUR WAYS

Preserves your dehumidifier's efficiency while protecting operators and occupants

1 Targets smaller particles with a layer of **electrostatically charged polypropylene**

2 Reduces build-up on internal dehumidifier components by capturing large particles with **expanded cellulose mesh**

3 Adsorbs odors and fumes with **activated carbon**

4 Helps prevent bacterial growth on the filter with **antimicrobial-treated filter layers**

For best performance change filter often. Replace filter whenever it appears dirty or heavily loaded with particles – do not vacuum or wash and reuse. **Do NOT** operate dehumidifiers while drywall sanding, generating sawdust or in spaces with excessive airborne particulates.
